PROFILE.

A professional software engineer with 3 years of experience focused on web application design and development, skilled in problem solving and executing software tasks from start to finish. Always being a responsible person, committed to any project that is carried out, creative and collaborative working as a team, learning from others and helping at all times.

PROFESSIONAL EXPERIENCE.

FRONT END DEVELOPER.

Protección Civil Guerrero / august 2018 – january 2021.

- Update and maintain the dependency website.
- Participate in software design discussions.
- Build and maintain a mobile application and a web system to disseminate recommendations issued by the agency.
- Development of a web system that manages the participation of people in courses / workshops for the Annual National Civil Protection Meeting of the Tropical Rain and Cyclone Season.
- Train agency staff on the use of developed tools.
- Deploying web applications in the agency's hosting.
- Development and improvement tools for the use of different teams inside the Dependency.

SOFTWARE ENGINEER.

By my own initiative.

- Build some web applications to improve my developer skills and at the same time show the react.js community in Spanish on Facebook my way of solving those projects, sharing the repository and examples on my website using my strengths in technologies such as:
 - Modern JavaScript with React, functional components.
 - Experience working with Context API, Redux, Axios.
 - Strong understanding of hooks, web performance and DOM.
 - Experience working with GraphQL and consuming Restful APIs.
 - Advanced CSS3/ Grid, flexbox, media queries, shadows, transitions.
 - Knowledge with Typescript, styled components.
 - Knowledge with Node.js, Express, Mongo DB, JSON.
 - Experience working with git and github.
